The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/554,066	Applicant(s) BENZIE ET AL.	
	Examiner David Andrews	Art Unit 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

Claim 4 lacks antecedent basis for "the previous casing." Claim 2 defines "the previous casing" and claim 4 will be examined as if dependent from claim 2, which is believed to be applicants intent.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 4, 6, 8, 11 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of these claims recites either "each step [a, b, or c]" or "each repeated step [a, b, or c]", while the method of these claims only recites one instance of each of these steps. The apparent claiming of multiple instances of each steps, without a more positive recitation of a repetition of these steps, leaves the scope of the claims indefinite. It should be noted that claim 2 provides the method of repeating these steps, and changing the dependency of these claims to stem from claim 2 would remove this rejection.

Claims 19-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 3672

applicant regards as the invention. These claims are ambiguously constructed and indeterminate in scope because they purport to claim both an apparatus and method of using or practicing the apparatus in a single claim.

Allowable Subject Matter

Claims 1, 2, 5, 7, 9, 10, 12-15, 17 and 18 are allowed.

Claims 3, 4, 6, 8, 11 and 16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not disclose a method of creating a borehole by drilling a section of borehole and lowering an expandable tubular element, radially expanding the lower portion of the element, separating an upper portion of the element to allow the portions to be relatively moved and lowering the separated upper portion through the expanded lower portion, as specifically recited in the claimed combination.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burge (US 7,178,601), Simpson et al. (US 7,004,264) and Metcalfe et al. (US 6,742,606) all disclose methods of creating a borehole with

Art Unit: 3672

expandable tubing, but none disclose separating a tubing above a previously expanded portion and lowering the separated portion through the expanded portion.
